15 MAY 1970

SUBJECT: Operational Report - Lessons Learned, Co H (RANGER), 75th Inf (ABN), Period Ending 30 April 1970, MCS CSFOR-65 (R2)

Commanding General  
1st Cavalry Division (AM)  
ATTN: AVDA GT-DT  
APO US Forces 96490

## 1. (C) Operations: Significant Activities

a. During the reporting period, Company H (RANGER) continued to provide long range reconnaissance and surveillance for the 1st Cavalry Division (AM). Ranger patrols continued to be deployed according to current enemy activity with emphasis being placed on the recovery of documents and positive identification of enemy routes of movement. During this reporting period, Company H (RANGER) employed 95 patrols, of which 47 made sightings of enemy personnel, resulting in 20 engagements and 6 VC/NVA KIA.

b. The Dong Tien operations with the ARVN Airborne Division, began in December 1969, ended on 22 April 1970. Under the program, selected members of the ARVN Airborne Recon Company were trained by H Company (RANGER) in methods and techniques of US LRP's. The program proved to be very successful.

c. During the reporting period three changes in key personnel were experienced. Captain William S. Carrier III replaced Captain Richard K. Griffiths as Commanding Officer, 1LT John H. Armstrong replaced Captain Arthur A. Rice as Executive Officer, 2LT John R. Rowland became a Platoon Leader.

d. On 07 February Ranger Team 43 was operating in the 2nd Brigade

AVDALL-11

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1970

AC. The area showed heavy recent use. The team set up in an ambush position at XU 555105 at 1745 hours. By 1940 hours a total of twenty armed individuals wearing green uniforms had moved past the ambush position. At 1944 hours approximately 30 individuals with bicycles stopped on the trail in front of the team's location. The patrol detonated the ambush and engaged with small arms fire and hand grenades, receiving small arms fire from the fleeing enemy. At 2005 hours when requested AAA and nighthawk aircraft arrived on station, the team adjusted the supporting fire on suspected enemy locations, and observed one secondary explosion. A check of the contact area revealed five NVA KIA, six bicycles, twelve 220 pound bags of rice, one SKS, and a significant amount of enemy equipment captured. At 2055 hours the team was extracted by C 1/9, after which an air strike was placed on the contact area.

e. On 170945 February, while in an overnight halt posture in the 2nd Brigade AO, vicinity of XU 220212, Ranger Team 45 observed thirty individuals move past its location. Twenty of the individuals were armed with AK-47's and ten were carrying large rucksacks. At 1035 hours 2nd Brigade Scouts arrived on station and engaged the individuals approximately two KI from the teams location. 2nd Brigade Scouts continued to engage the enemy as a total of eight-three individuals had passed by the teams location. 2nd Brigade Scouts, AAA, and nighthawk continuously monitoring the surrounding area and responding to ground-to-air fire accounted for forty-five enemy KIA. The Ranger Team did not engage the area.

f. Ranger Patrol 52 was performing reconnaissance and surveillance of its assigned area in the 3rd Brigade area. The patrol established an overnight halt at 091630 March at XU 926164. At 1800 hours the Assistant

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1970

Patrol Leader went into convulsions and the team leader immediately requested a Medevac. At 1825 hours the Medevac aircraft arrived on station. At the pilots request the team marked its position with smoke, thereby compromising its location. After the ATL was extracted by jungle penetrator, a lift ship from C 1/9 arrived on station to extract the remaining team members. A sit down LZ was not available and the aircraft commander informed the team that they would have to be extracted by jungle penetrator. At 1930 hours as the last two members of the team were raised to the aircraft one member of the team lost his grip and fell approximately 125 feet to his death.

g. On 111630 March Ranger Patrol 71 established an overnight halt to monitor a trail and several bunkers, in the vicinity of YT 037958, in the 3rd Brigade AO. At 1830 hours the patrol observed one individual staggering down the trail in front of their location. The patrol engaged the individual with small arms fire resulting in one enemy KIA. A search of the contact area revealed in addition to the one enemy KIA, one SKS, one AK-47, and a significant amount of enemy equipment.

h. Ranger Team 72 was monitoring a trail in the 2nd Brigade AO vicinity YU 493473 on 301350 March. At that time the team observed six individuals move past their location and engaged them with claymore mines and small arms fire, receiving heavy small arms fire in return. The team leader adjusted AAA onto the contact area. A check of the contact area produced three NVA KIA, three AK-47s, two rucksacks, and a sizeable amount of personnel equipment. As the extraction ship arrived on station the LOH of

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1970

the Pink Team reported movement closing in on the FZ from all sides. The extraction aircraft from C 1/9 hovered down through the trees where the team and captured equipment were loaded on board. Due to the excessive gross weight of the aircraft, the aircraft commander ordered the captured equipment to be jettisoned. This sufficiently reduced the aircraft weight allowing the ship to safely complete the extraction. The enemy gear was later recovered by an aircraft from C 1/9.

1. On 01 April, Ranger Patrol 55 at grid XU 950122, while monitoring a northwest-southeast trail observed 12 individuals moving to the northwest. The individuals were wearing green uniforms, and NVA chest web-gear, and carried AK-47s. Six individuals were carrying small packs. All the individuals had fresh haircuts and new uniforms. At 1555 hours, while monitoring the same trail, the team observed one individual moving to the southeast carrying an AK-47 and wearing chest web-gear and a green uniform. The team engaged the suspected enemy location with artillery. On 02 April, at 0700 hours, the patrol observed four individuals moving to the southeast on the trail with one individual carrying an M-16, US type web-gear, and fragmentation grenades. The remaining were carrying AK-47s, chest web-gear, and moderate size packs. At 1640 hours, the patrol leader, medic, and rear scout, while moving out to reconouflage claymore mines, received one fragmentation grenade which came from bushes on the opposite side of the trail. The grenade did not detonate. The patrol leader immediately picked up the grenade and threw it back toward the point from which it came. Shortly thereafter, the grenade exploded. The patrol engaged the area with small arms fire and received small arms fire in return. The patrol continued to suppress the contact area

## CONFIDENTIAL

AVD:LR-RF

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1970

with small arms fire until 1645 hours, when B 1/9 Air Cav and 2/20 ARA arrived on station. The 2/20 ARA suppressed the contact area until 1703 hours, at which time B 1/9 Air Cav requested that the patrol move to the FZ without checking the contact area due to a low POL supply on the helicopter. The patrol then moved east and was extracted by B 1/9 Air Cav at 1715 hours.

j. On 25 April Ranger Patrol 71 at YU 361351, while monitoring a north-south trail, heard two signal shots at 1550 hours. 200 meters to the east. At 1600 hours, the patrol heard movement 50 meters to the south and west. At 1605 hours, a light fire team arrived on station and engaged one individual 500 meters northeast of the team's location. The light fire team then spotted and engaged two individuals 100 meters southeast of the patrol. At 1615 hours, the patrol began moving northwest when the rear scout spotted and engaged one individual 30 meters to the southwest. The enemy evaded to the southwest leaving a heavy blood trail. The light fire team spotted and engaged the same individual in a fighting position 40 meters to the southwest. At 1645 hours, the light fire team spotted and engaged one more individual 50 meters to the northwest who was lying prone on the trail. At 1700 hours, the patrol moved northeast 200 meters to YU 363353, where they were extracted by a 227th Assault Helicopter Battalion Command and Control ship.

2. (C) Lessons Learned: Commander's Observation, Evaluations, and Recommendations

- a. Personnel: None
- b. Intelligence: None
- c. Operations: Tactics of the enemy

- (1) OBSERVATION: When a Ranger team observes a large enemy force, the team leader will call for artillery and/or ARA/Fink Team coverage. After the enemy has been engaged by supporting fires,

CONFIDENTIAL

## CONFIDENTIAL

AVD-LR-RF

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1970

it often dispatches a searching force to seek out the source of fire adjustment, in this case, the Ranger team.

- (2) EVALUATION: The enemy has a basic understanding of the tactics and habits of the Ranger-type units. He realizes that if suddenly he becomes the target of adjusted artillery or ARA fires while he is under jungle canopy, secure from aerial observation, someone must be adjusting those fires. The counter-measure which he often employs, is to backtrack along the traveled route to seek out his hidden enemy. This recon party either physically searches the area adjacent to the traveled route or recon it by fire.
- (3) RECOMMENDATION: Ranger teams must be particularly alert when covertly adjusting supporting fires on an observed enemy force. Should an enemy recon element begin to search for the team position, the Ranger team must take care not to prematurely compromise its location by firing at a distant enemy which itself is simply reconning by fire.

d. Organization: None

e. Training: None

f. Logistics: None

g. Communications:

- (1) OBSERVATION: Lack of satisfactory communications with teams in the field is a major problem for this command.
- (2) EVALUATION: The planning range for an AN/PRC 25 or AN/PRC 77 radio is 10-12 KM. Our Ranger teams consistently operate at ranges far in excess of these figures from either of the mountain relays. Although desirable, voice communication is not essential.

## CONFIDENTIAL

AVD.LR-R

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1970

H Company (RANGER) uses a sound code of squelch breaks to communicate when distances are great when voice comms is impossible. However, often times, ranges become so great that even squelch breaks are not effective. When this happens, Ranger teams cannot remain in the area. In practice, airborne relays at a nearby fire base is possible on occasion; however, due to a shortage of aircraft and Ranger personnel, it is seldom practical.

- (3) RECOMMENDATION: This command should be supplied with a portable radio set with a planning range of 20-25 KM. This additional planning range would greatly enhance the capability of Company H (RANGER) to perform its assigned mission.

h. Material: None

i. Others: Safety measures for the extraction by jungle penetrator.

- (1) OBSERVATION: A member of this command fell to his death while being extracted from a field location by jungle penetrator. A safe, fool-proof method of securing the rider to the jungle penetrator rig was deemed necessary.
- (2) EVALUATION: The bulk of a full rucksack prevents a Ranger from using the safety strap organic to a jungle penetrator. In addition, the weight of the equipment worn (rucksack and load bearing equipment) tends to pull the man backward off the seat of the jungle penetrator.
- (3) RECOMMENDATION: Men riding the jungle penetrator will not carry or wear equipment; it will, instead, be lashed to a "U"

**CONFIDENTIAL**

AVDAIR-FF

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1970

bolt welded to the penetrator shaft. The Ranger rider will tie his sling rope snugly around his chest securing it with a square knot and half-hitches. His snaplink will then be attached to the loose rope end and be secured to the penetrator cable. In this manner, the rider will be safely tied to the penetrator, in case he inadvertently falls. This safety measure is presently SOP for extraction of Ranger teams by jungle penetrator.

1. (U) This headquarters has reviewed and concurs with the Operational Report - Lessons Learned for the quarterly period ending 30 April 1970 from Company H (Ranger), 75th Infantry (Airborne).

2. (C) Reference item concerning "Lack of Satisfactory Communications", page 6, paragraph 2g. Ten radio sets, AN/PRC 74B, with AM voice capability of approximately 50 miles and CW capability of approximately 300 miles, have been authorized by MTOE 7-157 GPO2, dated 5 March 1970. Reporting unit has been notified of the authorization for the radio sets and will submit a requisition. Pending receipt of these radios through normal supply channels, the unit has made arrangements to procure, on a temporary loan, six radio sets, AN/PRC 74B, for field testing. No further action is required by this or higher headquarters.
